

**to Attagoyuk High School on Thursday, March 17 @ 7pm**  
*to celebrate the community and public launch of the*

The *siku* Atlas was developed as an educational resource to share the knowledge, stories, maps, language, and lessons from years of interviews, focus groups, sea ice trips, and workshops with Inuit sea ice experts in **Cape Dorset, Igloolik, Pangnirtung, and Clyde River**, Nunavut.

The screenshot shows the 'Sea Ice' section of the Inuit (aka Inua) Atlas. The page has a blue header with navigation links: Home, Go to Site, Case Report, Go to News, About, Working Together, and Find. Below the header, there are links for Features & Sites, Terminology, Inuit Knowledge, Working Together, and First Year Ice Service. The main content area is titled 'Sea Ice' and includes a 'Learn more' section with four links: Sea Ice, Inuit Knowledge, Working Together, and First Year Ice Service. The central part of the page features a map of the Arctic region with various sea ice types labeled: Thin Ice, First Year Ice, Multi-Year Ice, and Perennial Ice. The map also shows the Arctic Ocean, Baffin Bay, and the Canadian Arctic Archipelago. The bottom of the page has a footer with the text 'Inuit (aka Inua) Atlas' and '© 2014 Inuit (aka Inua) Atlas'.
