# RIGHTS AND RESPONSIBILITIES IN RESEARCH

## Obtaining Information on Research Projects

All NRI license holders must provide a plain language summary of research activities completed each year. These summaries are published each year in the NRI **compendia for research** (see Resources p. 17). These annual summary reports are available in English and Inuktitut, and for some locations in Inuinnaqtun. They are meant to provide a snapshot of research fieldwork including when, how, and by whom, and what information was collected. To obtain summary reports for any research projects conducted in or near your community or region please **contact the NRI Manager, Research Liaison** (see contact information below).

## Researchers' Ethical Obligations

Nunavummiut must be treated with fairness and respect. Researchers are required to abide by the laws of each community and to follow **ethical principles and codes of conduct** (see Resources p. 17). Researchers are expected to engage in culturally appropriate behaviour following local protocols. Researchers are responsible for learning what is respectful and responsible in the local context, as each community is different.

# Important information for Nunavummiut

## Your Rights in Research

Remember, **you always have the right to refuse to participate in a research project** even if your community has approved the research. Researchers must obtain your informed consent before they ask you any questions, and they must always respect your privacy and confidentiality.

**It is against the law to conduct research in Nunavut without a license.** Researchers must follow the terms and conditions in their research licenses and ensure their work does not cause harm or disruption to the community or to wildlife and the environment. Research licenses can be suspended or revoked, and a researcher may face fines or other penalties, when there is documented proof that research is causing harm.

If you have concerns that a researcher working in your community has not secured your informed consent, or may be causing harm or disruption, please **contact the Nunavut Science Advisor** (see contact below).

# ABOUT THIS REPORT

## About the Nunavut Research Institute (NRI)

The NRI has been responsible for developing, facilitating, and promoting scientific research in Nunavut since 1994. **The NRI works to ensure that research is a resource for the wellbeing of Nunavummiut** (people of Nunavut).

## Scientific Research Licenses

The NRI administers scientific research licensing under Nunavut's Scientists Act. The Scientists Act only applies to research in the **Physical and Natural Sciences (P), Health Sciences (H), and Social Sciences and Traditional Knowledge (SS), which is about 60% of all research that happens in Nunavut**. Research on archaeology, parks, and wildlife (including all terrestrial and aquatic animals, plants, birds, and fish) is licensed under different legislation and is not included in this report.

The **NRI's Scientific Research Licensing Guidelines** (see Resources, p. 17) provide information about the types of permits required for research in Nunavut, and how to apply for an NRI Scientific Research License in each discipline.

Did you know that the NRI only licenses about 60% of research happening in Nunavut?

## Why we created this report

**The goal of this report is to help Nunavummiut learn about who is doing research, what they are studying, and where.** This report was developed by analyzing research summaries from NRI license applications. To learn more about the numbers presented in this report, see **Understanding the Numbers** (p. 16). This work is part of the NRI's ongoing efforts to:

- 1.improve Inuit engagement in research;
- 2.make research results more accessible to Nunavummiut;
- 3.reduce community research fatigue; and,
- 4.encourage research that addresses Inuit priorities.

## Other Research Permits

Even when researchers have a license, they might require other approvals to conduct their project. Other approvals are usually required for fieldwork, depending on the location and type of research activity. Examples of other authorizations a researcher may need include:

- Review by the **Nunavut Planning Commission** (NPC) - for all land and water based activities;
- Screening by the **Nunavut Impact Review Board** (NIRB) - environmental impact screening;
- Authorization from the **Nunavut Water Board** (NWB) - to use water or deposit waste in the environment;
- Approval from **Crown Indigenous Relations and Northern Affairs Canada** (CIRNAC) - to use Federal Crown Lands in Nunavut for research purposes; and,
- Approval from a **Regional Inuit Association** (RIA) - to access or use Inuit Owned Lands for research purposes.

# RESEARCH IN AND AROUND RESOLUTE BAY (2004-2019)

**510** TOTAL LICENSES  
CONNECTED TO  
RESOLUTE BAY

**234** TOTAL PROJECTS  
CONNECTED TO  
RESOLUTE BAY

## WHERE RESEARCH IS HAPPENING

A research license is required for each year that a research project takes place in Nunavut. Projects that are conducted for longer than one year can receive a multi-year research license, and this must be renewed at the end of each year.

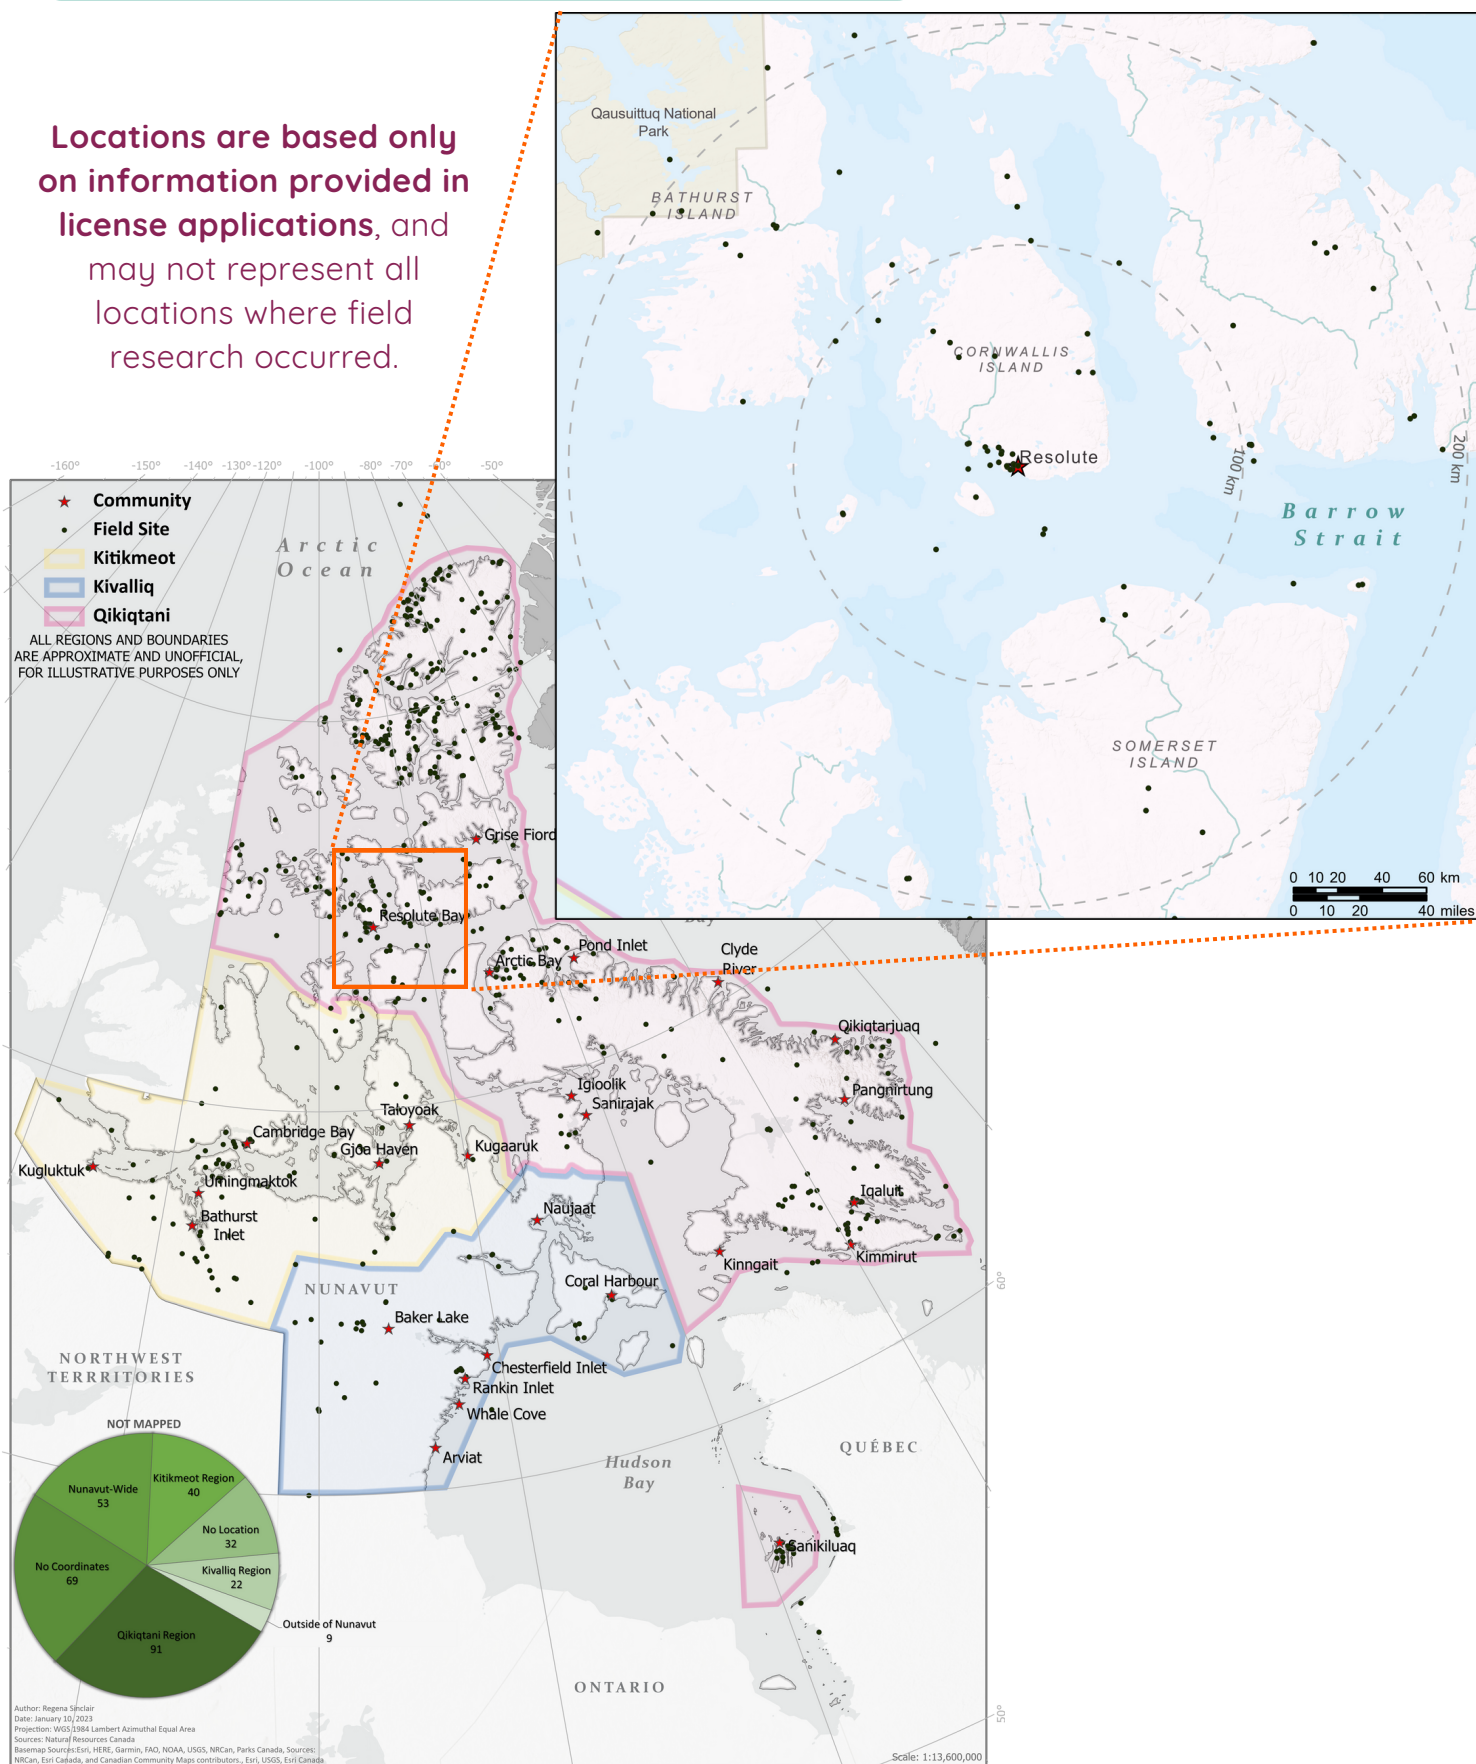

## TOTAL NUMBER OF PROJECTS

# RESEARCH LOCATIONS

Locations are based only on information provided in license applications, and may not represent all locations where field research occurred.

# WHO IS DOING RESEARCH IN AND AROUND RESOLUTE BAY?

A **Principal Investigator (PI)** is the lead researcher on a project. The PI takes responsibility for submitting the license application, and making sure that the proposal is followed or adjusted as needed. The PI often lists other **research team members** in their application. However, numbers shown here only represent the affiliation of the PI.

## LICENSE REVIEW BY COMMUNITY ORGANIZATION

Resolute Bay District Education Authority\*

Review numbers only represent local community organizations that received research license applications to review.

The Government of Nunavut, Nunavut Tunngavik Incorporated, Regional Inuit Organizations, Institutes of Public Government, the Government of Canada, and Non-Governmental Organizations also review research licenses. These could not be easily associated with communities and so are included in regional numbers (p. 13) and the Nunavut-wide report.

## TOTAL LICENSES REVIEWED BY COMMUNITY ORGANIZATIONS

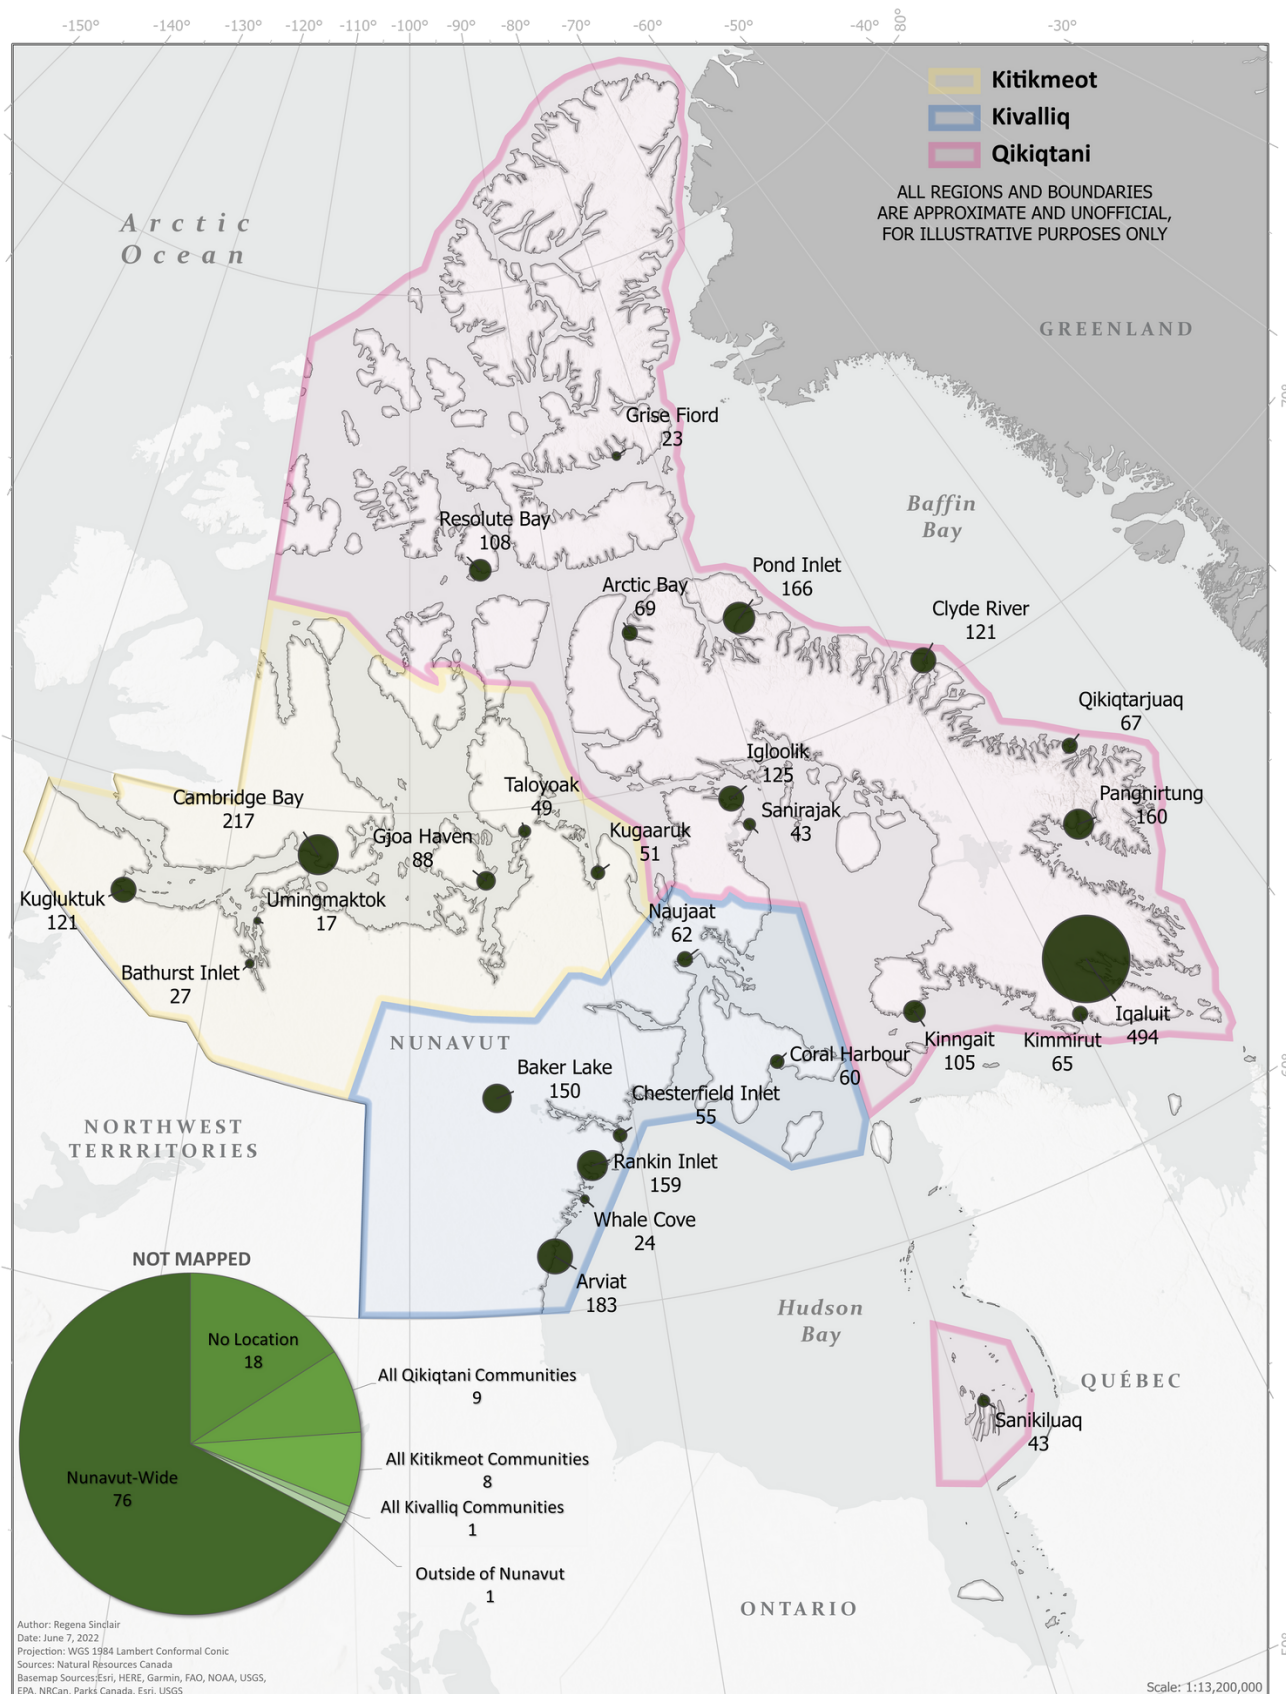

- Hamlet of Resolute Bay (Qausuittuq)
- Resolute Bay Hunters and Trappers Association
- Resolute Bay District Education Authority\*

\*District Education Authority feedback is received by the Government of Nunavut Department of Education, not directly by the Nunavut Research Institute.

# RESEARCH TRENDS ACROSS NUNAVUT

## TOTAL LICENSES BY REGION

## LICENSE REVIEW BY ORGANIZATION TYPE (OUT OF 17,037 REVIEWS)

## TOTAL NUMBER OF PROJECTS BY COMMUNITY AND DISCIPLINE

# UNDERSTANDING THE NUMBERS

The information we used to create this report is explained here, to help understand some of the limitations.

## Analysis of License Applications

The research numbers and trends shown in this report are based on the analysis of Scientific Research License Applications. If a full application was not available, the research summary from the NRI annual compendium was used. This means that ***the analysis only reflects what a researcher proposed when first applying for their license.*** The numbers do not reflect any final changes or adjustments that a researcher made when actually carrying out the project.

## Types of Research

***The research numbers and trends shown in this report only represent about 60% of the research that happens in Nunavut.*** This includes research in the Physical and Natural Sciences (P), Health Sciences (H), and Social Sciences and Traditional Knowledge (SS). Other kinds of research have a separate permitting process, and are not included in this report (see About this Report, p. 2).

## Nunavut-led Research

Some scientific activities led by government agencies, Inuit organizations, and by individual Nunavummiut do not require licensing under the Scientists Act. For this reason, **the number of Nunavut-led research activities is likely under-represented in the report.** Refer to the NRI's Scientific Research Licensing Guidelines for a list of research activities that are currently exempt from licensing (see Resources p. 17).

## Research Topics

For each project we reviewed the summary available in the license application, or annual compendium, to identify all topics relevant to the research (p. 7). This helped to identify the range of research topics covered in Nunavut, as well as to develop keywords that can be used to search research projects in the future.
